SUMMARY

Human-Computer Interaction specialist with experience in product management, user research, technical requirements, and software development. Drawn to complex problems where thoughtful improvements have a tangible impact.

EDUCATION

B.S. Symbolic Systems (Human-Computer Interaction), Honors, Stanford University | GPA 3.9 — *Jun 2026*

PRODUCT & TECHNICAL EXPERIENCE

Epic Systems — Verona, WI

Technical Solutions Engineer — *Jul 2026–Present*

- Improved healthcare provider workflows for 5M+ patients by shipping a configurable visit notification feature.
- Engineered an automated PowerShell workflow to generate and send targeted workqueue status emails, cutting the team's mean overdue time for code fixes by 20%.
- Managed MyChart release pipelines and development timelines for 3 health systems.

Thesis, Virtual Human Interaction Lab — *Mar 2025–Jun 2026*

Student Researcher

- Directed a 12-month, 133-participant research study on VR/AR teleconferencing, writing experimental protocols, training 5 research assistants, running all sessions, and authoring an Honors thesis.
- Built Python and R scripts to analyze survey, audio transcript, and headset video data, uncovering why users often preferred familiar 2D grids over immersive 3D layouts.

The Stanford Harmonics (A cappella) — Stanford, CA

Business Manager & Album Director — *Sep 2022–Jun 2026*

- Redesigned website, branding, and information architecture, increasing monthly traffic by 75% and doubling audition-season reach.
- Managed a $70K annual operating budget, $100K endowed fund, and $50K equipment portfolio while supporting international tours and events for 600+ attendees.
- Directed album production, distribution, and go-to-market strategy, reaching 25K+ monthly listeners and generating $3K in annual revenue.

VolunteerVerse (Fall 2025)

Full Stack Developer

- Built React Native frontend and Supabase backend for an app matching volunteers with local organizations.
- Developed profile and event creation, organization discovery, scheduling, and calendar features in TypeScript.

T.AI (Fall 2024)

Product Researcher and Strategist

- Interviewed 4 educators and 2 students to identify grading pain points, using findings to inform product features.
- Designed an interactive medium-fidelity Figma prototype for use in usability and heuristic testing.
- Conducted heuristic and usability tests to define a model for individualized, actionable student feedback.

LEADERSHIP & OPERATIONS EXPERIENCE

Stanford Residential & Dining Enterprises — Stanford, CA

Service Center Lead — *Jun 2024–Sep 2025*

- Automated housing workflows and led cross-functional operations supporting 1,600 beds and 1,000+ attendees.
- Optimized billing and asset-management processes, achieving 100% of KPIs/SLAs and saving $40K.

Stanford Frosh101 — Stanford, CA

Lead; Lead Trainer — *Mar 2023–Dec 2024*

- Developed leadership and training curricula and coached student leaders across 3 academic quarters.

SKILLS

Product: Product Strategy, Technical Requirements, UX Design, User Research, Usability Testing, Backlog Prioritization
Technical: Python, TypeScript, JavaScript, React Native, Supabase, Git, HTML/CSS, Figma
